ECE Launches MyECESM and ECE WalletTM, Advancing Digital Credential Recognition and Sharing

New digital tools modernize credential evaluations and simplify the application process

MILWAUKEE — Oct. 15, 2026 — Educational Credential Evaluators, Inc. (ECE) today launched MyECESM, a redesigned application experience, and ECE WalletTM, powered by Pearsana, an innovative digital credential sharing solution. Together, these launches represent a significant step in ECE's ongoing commitment to modernizing credential evaluation services and making the recognition of international education more accessible and convenient.

Developed through ECE's strategic partnership with Pearsana, ECE WalletTM introduces a first-of-its-kind unlimited sharing option in credential evaluation. Customers with an active subscription can securely share their evaluation report and verified academic records with unlimited recipients, reducing the costs and administrative barriers associated with pursuing educational and professional opportunities.

Credential evaluations can open doors to education, employment and professional licensure for people with education obtained across countries, but applicants may face a series of administrative hurdles: collecting records from different institutions, figuring out which documents are required, tracking an application and sending an evaluation to several recipients. The process often involves more than the initial evaluation fee, especially for applicants who require additional report copies.

With ECE WalletTM, customers can share their ECE[®] evaluation report and verified academic records with as many recipients as needed without purchasing a separate report copy for each request. The records are kept together in one secure digital location, ready to share as plans evolve. ECE is introducing a new approach to credential evaluation sharing that gives individuals greater flexibility and control over how they use their report and assessed credentials.

"We're proud to partner with ECE, an organization that shares our belief that students should always come first," said Gareth Maguire, founder of Pearsana. "Our teams have worked

Endless Possibilities.™

incredibly hard together to bring ECE Wallet™ to life, and the collective impact we can have is enormous. Hard-earned achievements should open doors, not create paperwork, and ECE Wallet™ makes that possible.”

The collaboration with Pearsana brings together ECE’s more than 45 years of expertise in international credential evaluation with Pearsana’s digital credential technology. The partnership reflects a shared commitment to improving how educational achievements are recognized, accessed and shared across institutions, employers, and professional pathways.

“People should be able to focus on their education and career goals, not the administrative work involved in proving their credentials,” said Stacy Riley, president of ECE. “We recognize that plans change and credentials need to move with you, not slow you down. Through our partnership with Pearsana, we’re bringing new possibilities to credential recognition and sharing, helping individuals make great use of their educational achievements as new opportunities arise. Combined with our redesigned MyECESM experience, this launch reflects our commitment to innovative technology and human-centered service.”

MyECESM provides individual applicants and recruitment agents with a more intuitive, streamlined experience for ordering and managing ECE® credential evaluation reports. The mobile-friendly portal walks applicants through each step and provides document requirements tailored to their country, educational institution and dates of attendance. By making these requirements more accessible and easier to understand, MyECESM helps applicants submit the correct documents and avoid unnecessary delays. Additional enhancements include the ability to save and return to an application, view evaluation progress through a centralized dashboard, and access completed reports. Improved delivery validation also helps reduce address errors. Together, these improvements create a more consistent, user-friendly experience from application through report delivery.

The launch of MyECESM and ECE Wallet™ reflects ECE’s continued investment in technology and services that support the global recognition of educational achievements. By simplifying the evaluation and expanding how credentials can be shared, ECE is helping internationally educated individuals navigate their next steps with greater confidence, flexibility, and opportunity.

About Educational Credential Evaluators

**Expert Evaluations.
Endless Possibilities.™**

Educational Credential Evaluators Inc. is a 501(c)(3) nonprofit located in Milwaukee, Wis. Founded in 1980, [ECE](#) evaluates international educational credentials of individuals for the purposes of studying or working in the U.S., Canada, and beyond. ECE® reports give individuals from other countries the assessment they deserve for education completed in their home countries and give higher education institutions, employers, health care organizations, and licensing boards confidence that educational equivalencies between countries are accurate. ECE's mission is to advance fair and accurate global recognition of qualifications through trusted expertise, innovative technology, and human-centered service. In addition to providing reports, the ECE Connection™, an international hub for sharing credential evaluation resources and knowledge, provides ongoing support to the international education community.

About Pearsana

Pearsana is a secure blockchain-backed digital credential wallet platform developed and operated by Inspirus Global Education Limited, enabling students to store, verify, and share verified academic credentials across institutions, borders, and jurisdictions. Pearsana is available at pearsana.com.
